## CLINIC, ER ON-CALL, ACUTE & LTC IN-PATIENT COVERAGE

### McCausland Hospital & In-patient coverage

McCausland Hospital is a 45-bed accredited facility in Terrace Bay. It serves a catchment area of approximately 3,600 residents from the surrounding communities of Schreiber, Rosspoint and Pays Plat First Nations Reserve. Thunder Bay Regional Hospital is a 2-hr drive by land and access by helicopter is via ORNGE air ambulance service.

The Hospital has 10 acute care beds and 13 chronic care beds. The Long-Term Care (LTC) facility of Wilkes Terrace is attached to the hospital complex and services 22 beds. Locums cover Acute in-patients and urgent CC/LTC issues for the physician for whom they are covering and the in-patients they admit during their stay. Admitted patients are handed over to their family physician when applicable to do so. The physician on-call covers all acute patients after hours and on weekends. For the most part this will range from 0-5 acute patients.

Diagnostic imaging (x-ray and ultrasound) and laboratory services on-site and are available 24 hrs a day. Physiotherapy, dietician and social work services are available for in-patients and out-patients. Telemedicine and chemotherapy services are also offered.

### What is Working in the Schreiber or Terrace Bay Medical Clinic Like?

The North Shore Family Health Team includes two clinics - one in Terrace Bay and one in Schreiber. Each clinic staffs two full time physicians. We also share a nurse practitioner, dietician, social worker/mental health worker and diabetes nurse. Physicians typically see between 10-15 patients per day. Clinic staff is friendly & experienced. On-call physicians are booked more lightly in the clinic and appointments can be cancelled if necessary due to the emergency department situation.

### What is On-Call Coverage Like?

Our emergency department is unique in the North in that it is not usually overly busy. Physicians usually take call from clinic, home or outside the Hospital with excellent experienced nurses providing triage services. In an average 24 hour period, the on-call physician can expect 5-10 patients a day. Most patients are low acuity and are often deferred to the clinic or seen the next day.

## LOCUM TESTIMONIALS

*"Terrace Bay/Schreiber is a great place to do locums, especially for new grads! The local physicians are extremely supportive and all the staff, from administration to nursing, are very helpful and friendly. They really go the extra mile to make locums feel comfortable and well supported. As a locum, you have a wide scope of practice that's interesting and challenging at the same time and the work load is perfectly adequate without making you feel overwhelmed. Locuming in Terrace Bay/Schreiber offers the perfect balance between work and some fun time! "*

Dr. Yuexi Chen - Montreal, QC

*I have always enjoyed doing locums with the North Shore Family Health Team, to the point that I continue to return there even though I have relocated to Victoria, BC. The NSFHT goes out of its way to make the locum as stress-free as possible, from arranging accommodation (with a welcome basket of goodies!) to assisting with documentation. As a place to locum, it is an exceptionally pleasant place to work.*

Dr. Ian Thompson - Victoria, BC

*As a recent family medicine graduate, I have thoroughly enjoyed my time working with the North Shore Family Health Team. The staff is friendly, welcoming and extremely helpful. Terrace Bay is a beautiful town with friendly people. Working and living in Terrace Bay has been an extremely positive experience that I recommend highly to my colleagues.*

Dr. Hannah Shaheen, Burlington, ON

*Working in Terrace Bay is excellent! The clinic is well run and the nursing staff at McCausland Hospital is proficient and easy to work with. The range of patients you will see in clinic and hospital is always interesting. Best of all, they take care of their locums and truly appreciate your contributions.*

Dr. Sarah Peters, Kaministiquia, ON
